Key aspects of a good quality SK-AT CBC project

Key elements that are of importance in the course of project assessment

- Convincing CBC Partnership (balanced and sustainable)
- Projects in public interest (topic relevant for both sides of the border)
- Strong regional context („sell“ the project to the CBC regions)
- Understandable and visible Cross Border Impact (where is the cross border impact?; no one way projects...)
- Sustainability (what happens after the project completion?; are there links to project outputs and partnership?)

Program cezhraničnejspolupráce SLOVENSÁ REPUBLIKA - RAKÚSKO 2007-2013

The most frequent problems

90% of problems are related to project design/contents and SK-AT cross border relevancy

- Poorly designed application form
- Missing cross border impact
- Poor sustainability of project activities
- Detailed budget with no links to project outputs
- Poor language and translations (more preparation for good quality translation needed)
- **Too short time reserved for the project preparation and content development with partner institutions**

Main points to be considered before project submission

- No project pre-financing (only reimbursement)
- Own resources needed in Slovakia (max. 5%)
- National co-financing in Austria requires more time for preparation/negotiations

(each AT partner needs public co-financing (min. 15%); either own public or from a public institution).
